## EXECUTIVE SUMMARY

The Türkiye Public and Municipal Renewable Energy Project (PUMREP) aims to support the Government of Türkiye to scale-up renewable energy use in the public sector by focusing on central government buildings and municipalities. The Project will contribute to expanding the distributed Renewable Energy (RE) market in public facilities by addressing the barriers discussed above and help demonstrate leadership in the public sector to use sustainable energy solutions to deliver on the country's climate mitigation commitment and enhance energy security.

ILBANK has established an Environmental and Social Management System (ESMS) effective on 24th of Dec 2023. The ESMS is aimed at ensuring systematic identification, assessment, management, monitoring, and reporting of the environmental and social (E&S) risks and impacts of the projects and subprojects financed by the IFIs. This process should be implemented on an ongoing basis throughout their loan duration in line with the requirements of the national legislation, international agreements and conventions ratified by Türkiye and E&S standards of lending IFIs (World Bank for the PUMREP). As a critical element of the ESMS, ILBANK has adopted and published<sup>1</sup> an E&S Policy applicable to all ILBANK projects and subprojects financed through IFIs.

The subproject is planned to be built in Çankırı Province Central District İnaç Neighborhood lot 12 of block 170. The parcel in question is 29,816 m<sup>2</sup>. 13,986 m<sup>2</sup> of the land will be used for the solar energy plant. The land belongs to the Treasury and was pre-allocated to Çankırı Municipality on 20.09.2024.

This SEP has been formulated to ensure that project affected parties, other interested parties and disadvantaged/vulnerable groups that constitute the stakeholders are provided relevant, timely and accessible information so that they have an opportunity to express their views and concerns about the sub-project and its impacts.

The SEP establishes a systematic approach to stakeholder engagement that will help Çankırı Municipality to identify all stakeholders and how they will be affected by the sub-project and ensure that the sub-project is implemented in a participatory and community-friendly manner through building and maintaining a continuous constructive relationship with them, in particular with project-affected parties.

SEP also assesses the level of stakeholder interest and support for the sub-project and guides the relations of the Çankırı Municipality team with the stakeholders throughout the pre-construction, construction and operation process, enabling stakeholders' views to be taken into account in sub-project design and environmental and social performance.

SEP is designed to ensure that relevant sub-project information on environmental and social risks and impacts is disclosed to stakeholders in a timely, understandable, accessible and appropriate manner and format.

The sub-project is categorized as Moderate Risk Category as per ILBANK ESMS and World Bank's Environmental and Social Framework (WB ESF), 2018. One of the tasks under the scope of the subproject is the preparation of a Stakeholder Engagement Plan (SEP) in accordance with ILBANK ESMS, WB ESF, and the national legislation in force in Türkiye. This SEP is prepared to identify all stakeholders, inform them about the project and its potential environmental and social risks and impacts, and their interest in the sub-project and to establish an effective communication with stakeholders and to define procedures and principles to improve engagement. This Plan aims to create long-term relations between the sub-project and local communities based on mutual trust and transparency. In addition, it is aimed to reduce the negative effects that may arise from the project and increase the positive effects. By implementation of this SEP, stakeholders will be able to access to the information about the sub-project, its investments, installation works and operation activities in a timely manner. This plan includes the legal framework, process of identifying stakeholders, explaining the stakeholder engagement program (comprising purpose and timing, proposed strategy for information disclosure, proposed strategy for consultation, future engagement activities, grievance mechanism covering receiving and closing grievances, taking necessary actions

---

<sup>1</sup> <https://www.ilbank.gov.tr/sayfa/ilbank-environmental-and-social-policy>

and management of grievances). In addition, specific engagement and disclosure activities targeting vulnerable/disadvantaged groups/individuals identified under the SEP have been defined

In order to obtain information about the current socio-economic structure of the neighborhood in the subject area studies, as well as to determine the level of information about the sub- project, opinions and concerns about the sub-project, a sub-project site visit was organized by CA Engineering officer on 01.02.2025. Finally, a Grievance Monitoring Table is presented at the end of this SEP and the tools of monitoring activities to be carried out to evaluate the performance and effectiveness of the sub-project are suggested.

# 1. INTRODUCTION/PROJECT DESCRIPTION

## 1.1. Objectives of the subproject

The Public and Municipal Renewable Energy Project (PUMREP) (hereinafter the “Project”) aims to support the Government of Türkiye to scale-up Renewable Energy (RE) use in the public sector by focusing on central government buildings and municipalities. The sub-project involves the establishment and operation of “Çankırı Municipality 999 kWe / 1.190 kWp Solar Power Plant, located within the borders of İnaç Neighborhood in the Central District of Çankırı Province. The Project is financed by World Bank (WB) to support introducing RE technologies in municipalities. İller Bankası A.Ş. (İLBANK) acts as the Financial Intermediary (FI). The RE installations will be primarily used to offset the overall energy consumption from public facilities (i.e. administrative buildings, water supply and water treatment, public lighting, etc.) and thus reduce the municipalities’ energy bills.

The potential environmental and social risks and impacts of the Project is provided in the Environmental and Social Management Plan (ESMP) which is available at [link ]. The Project’s environmental and social risk classification is determined as moderate.

This document is prepared in accordance with Environmental and Social Standard (ESS) 10 on Stakeholder Engagement and Information Disclosure, as part of the Environmental and Social Framework (ESF) Çankırı Municipality is responsible for stakeholder engagement activities and grievance resolution, ensuring that the sub-project is carried out in an inclusive and participatory manner.

## 1.1.Components of the subproject

The sub-project includes the installation of “999 kWe / 1,190 kWp Solar Power Plant” in the lot 12 of block 170. A 140-meter underground energy transmission line (ETL) will be constructed to connect the solar power plants to the existing transformer used by SPP established in the parcel numbered 170 of block 8 of Çankırı Municipality. The ETL route will pass through parcels 170/9 and 170/8 and will be connected to the transformer located in parcel 170/8. In addition, the existing stabilized road will be used as the sub-project access road within the scope of the sub-project. No new road will be constructed.

## 1.2.Subproject Location

The sub-project covers the establishment and operation of “999 kWe / 1,190 kWp Solar Power Plant” by Çankırı Municipality on lot 12 of block 170 located within the borders of İnaç Neighborhood, Central District of Çankırı Province. The ETL route will pass through lots 8 and 9 of block 170 and will be connected to the existing SPP transformer. Lot 12 of block 170, where the sub-project will be established, and lot 9 of block 170, where the ETL will pass, belong to the Ministry of Treasury and Finance and the allocation process is completed by Çankırı Municipality. There is no agricultural or animal husbandry activity area or commercial enterprise on the land. It has not been used as a commercial enterprise by the municipality or 3rd parties before. There is no area around the SPP land where agricultural and animal husbandry activities are carried out.

Table 1. Location of Sub-project and ETL

Province	Distirct	Neighborhood	Project Component	Block	Lot
Çankırı	Central	İnaç	Solar Power Plant (SPP)	170	12
Çankırı	Central	İnaç	ETL	170	8 and 9

Therefore, the noise impacts of the subproject are not expected to reach a significant level beyond 50 meters, and the traffic impacts are anticipated to remain within the boundaries of İnaç Neighborhood, without extending beyond the neighborhood. The Area of Influence has been determined taking into account these two factors.

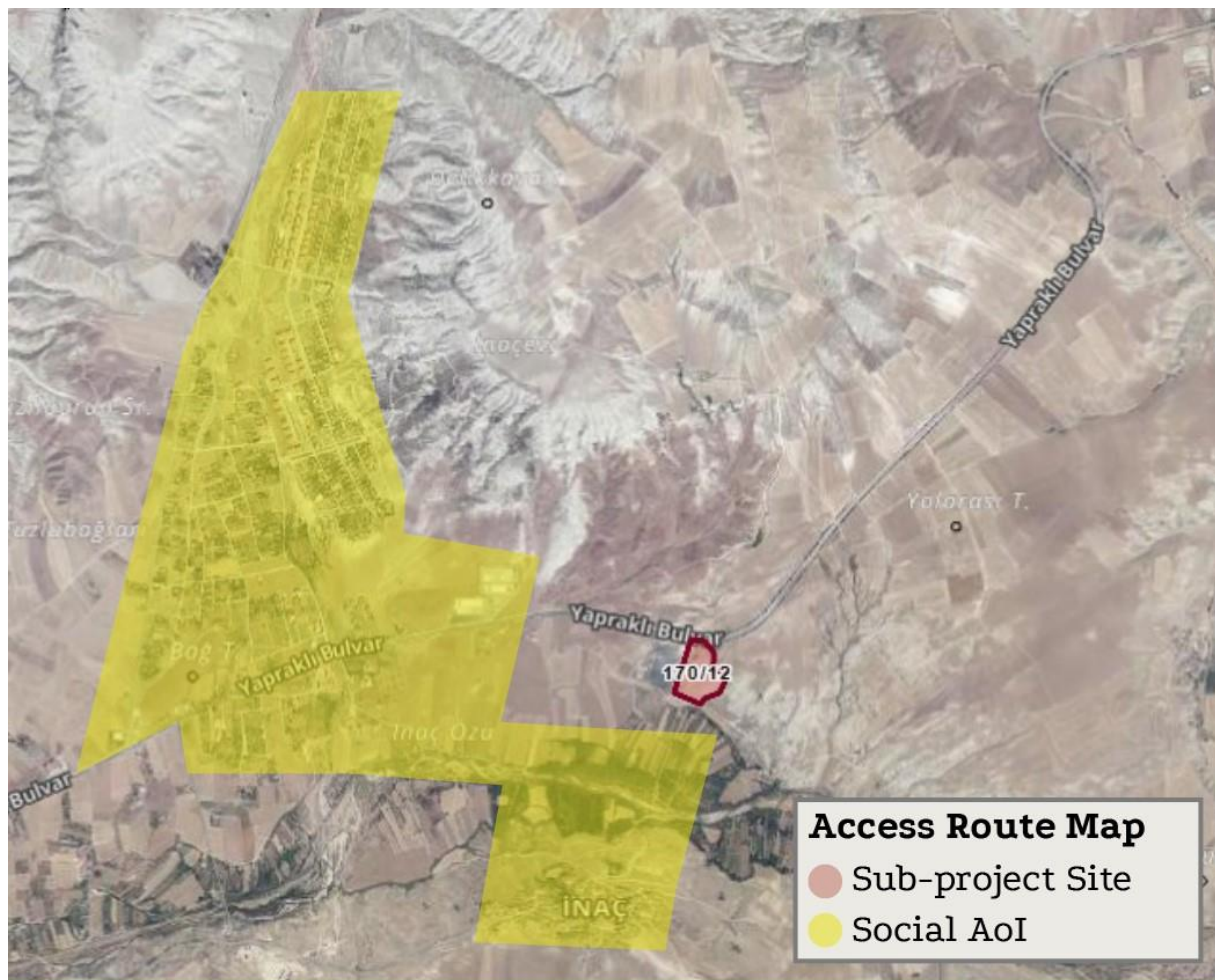

Figure 2. Sub-project Area of Influence

## 2. OBJECTIVE/ DESCRIPTION OF SEP

The overall objective of this SEP is to define a program for stakeholder engagement, including public information disclosure and consultation throughout the entire sub-project cycle. The SEP outlines how the Çankırı Municipality PIU (Project Implementation Unit) will communicate with stakeholders and includes a mechanism by which people can raise concerns, provide feedback, or make complaints about subproject activities or related issues. The SEP specifically emphasizes methods to engage vulnerable groups at risk of being excluded from the subproject benefits.

As an important tool in the management of the environmental and social impacts of the sub-project, SEP increases awareness of the sub-project, identifies stakeholders' views, ensures that their opinions and concerns are taken into consideration, and increases trust in the sub-project processes. This SEP) aims to support Çankırı Municipality in identifying its stakeholders and fostering constructive relationships, particularly with those affected by the sub-project.

SEP promotes effective and inclusive engagement with affected parties throughout the subproject lifecycle, addressing potentially impactful issues. It ensures that information on environmental and social risks and impacts are disclosed in a timely, understandable, and accessible manner. Additionally, the SEP provides affected parties with inclusive tools to voice concerns and grievances, enabling Çankırı Municipality to respond and manage these effectively. By creating a transparent and respectful environment, the SEP encourages the inclusion of diverse cultural norms and engagement capacities, fostering fair and open dialogue to address stakeholder concerns engagement“

SEP has been developed to comply with both national legal requirements and World Bank's Environmental and Social Standard 10 (ESS10). This project-specific SEP is a public document that will be regularly updated based on ongoing discussions and engagement with stakeholders, reflecting their views and input throughout the sub-project.

### 3. STAKEHOLDER IDENTIFICATION AND ANALYSIS

In the stakeholder identification process, the potential impacts of the sub-project are assessed, and strategies for engaging stakeholders are developed, including the frequency and methods of communication. It is especially important to focus on identifying vulnerable or disadvantaged groups who may be more severely affected by the sub-project or face challenges in participating in the engagement process. Identifying stakeholders is an ongoing activity and will be continuously reviewed and updated as needed.

#### 3.1. Methodology

To follow best practices in stakeholder engagement, the project will apply the following principles:

- **Openness and Life-cycle Approach:** Public consultations will be held throughout the entire subproject life cycle in an open and transparent way, ensuring that there is no outside influence, manipulation, or intimidation.
- **Informed Participation and Feedback:** Relevant information will be shared with all stakeholders in an accessible format. There will be opportunities for stakeholders to provide feedback, and their comments and concerns will be carefully analyzed and addressed.
- **Inclusiveness and Sensitivity:** The stakeholder identification process will focus on building strong, effective relationships and ensuring that all stakeholders are included in the consultation process. Everyone will have equal access to information. Engagement methods will be chosen based on the needs of the stakeholders, with particular attention to vulnerable groups such as women, the elderly, people with disabilities, displaced persons, migrant workers, and communities. Cultural sensitivities will also be carefully considered to ensure the participation of diverse ethnic groups.

Stakeholder identification follows an overall analysis of sub-project's scope, objectives, and potential impacts. Each stakeholder group is assessed for their interest and influence on the sub -project as well as for their potential exposure and vulnerability to sub-project impacts. The preliminary step is to designate the affected parties and other interested parties and analyze the level of influence and/or interest for each group.

The intensity of the impacts requires interaction in different ways in terms of engagement. During the mapping process of the stakeholders, the nature of the sub-project impacts are identified, and the methods and frequencies of the relations to be built with stakeholders are formulated. It is critical that particular efforts are given to identify disadvantaged and vulnerable stakeholders who may be differentially or disproportionately affected by the sub-project or who may have difficulty participating in the engagement and development processes. Stakeholder identification is also an ongoing process and will need to be regularly reviewed and updated.

To ensure a meaningful consultation process regarding the sub-project, it is crucial to identify relevant stakeholders. In this context, a site visit was conducted by the ÇA Engineering firm on Feb 1, 2025. During the site visit, meetings were held with Çankırı Municipality officials, and information about the sub-project sites was gathered through on-site inspections. In this regard, meetings were conducted with the mukhtar of İnaç neighborhood. Field visit visuals are given in Annex-E.

Discussions with the mukhtar included topics such as the demographic status of the neighborhoods, suggestions and concerns regarding the sub-project. Meetings also covered the socio-economic and demographic structures, as well as infrastructure services, of İnaç neighborhood. Additionally, individual consultations were held with seven residents of İnaç neighborhood to gather their opinions, suggestions, and concerns about the sub-project. During the field visit to the sub-project areas, it was determined that there were no official or unofficial users and that the lands were not used by the local people for agriculture, animal husbandry and grazing activities. All data specified in the report were processed based on the mukhtar interviews conducted during the field visit and the information received from the local people

After determining the impacts of the sub-project, the first step of the stakeholder engagement process will be to determine the stakeholders of the sub-project. While determining the stakeholders, Çankırı Municipality will also determine the needs and expectations for engagement, including the priorities and goals related to the sub-project.

Stakeholders will be defined as follows in accordance with ESS10;

- Project affected parties (PAPs),
- Other interested parties(OIPs),
- Vulnerable and disadvantaged.

### 3.2. Project Affected Parties

The term "project-affected parties" refers to individuals or groups who are likely to be affected by the sub-project due to direct impacts or potential risks on their physical environment, health, safety, cultural practices.

The key PAP's who will be cooperated and consulted about and during the sub-project, including individuals, groups and communities are:

- Residents of İnaç Neighborhood (209 people) Workers to be employed for the construction activities
- Local businesses in the process of supplying materials and equipment

### 3.3. Other Interested Parties

Other interested parties include individuals, groups and others who may have an interest in the sub-project because of their location, proximity to natural or other resources, or the sector or parties involved in the sub-project. This may include local government officials, community leaders, media and civil society organizations, particularly those working in or with affected communities.

Maintaining regular relationships with media stakeholders is sufficient to provide regular information at local and national level in Çankırı Province. In all cases, the media plays an important role in informing the public and building public perception of the sub-project. Detailed information on other Interested Parties is provided in Table 3.

### 3.4. Disadvantaged/ vulnerable individuals or groups

Disadvantaged/Vulnerable individuals or groups are persons who may be disproportionately impacted or further disadvantaged by the project(s) compared with any other groups due to their vulnerable status, and that may require special engagement efforts to ensure their equal representation in the consultation and decision-making process associated with the project.

However, vulnerable and disadvantaged groups residing in İnaç Neighborhood, where the sub-project activities will be carried out, may be adversely affected due to their limited ability to express concerns, understand the interests of the sub-project, or access and comprehend project-related information.

Details of Vulnerable and Disadvantage Groups according to the information obtained from the mukhtar of İnaç Neighborhood, the closest settlement to the sub-project site, are given in Table 2.

*Table 2.İnaç Neighborhood vulnerable and disadvantage groups*

Vulnerable and Disadvantage Groups	Number of People
Households with family members who are physically and/or mentally disabled	6
Chronic diseases	22
Surviving on social assistance from the state, associations or individuals	3
Over 70 years of age and living alone	12

Female-headed households	13
Total Vulnerable and Disadvantage Groups	56

*Source: Mukhtar Meetings, 2025.*

According to the interviews conducted with mukhtar of İnaç neighborhood on 01.02.2025 during the consultations carried out within the scope of SEP and the information received from the municipality staff, there are no refugee residing in the sub-project area. Lack of access to the transportation budget due to unemployment or poverty, difficulty in accessing activities due to physical disability will cause difficulties in reaching vulnerable/disadvantaged individuals/groups in terms of engagement in consultation activities and events. Within the sub-project impact area, there is no structure. Additionally, the nearest occupied houses are located approximately 75 and 166 meters from the sub-project site. However, programs will be developed to facilitate the engagement of the disadvantaged/disadvantaged groups/individuals in consultations. In the event of any employment opportunity for the unemployed within the scope of the sub-project, an announcement will be made to the muhtars' offices and local people will be prioritized in recruitment. There is no language spoken in the region other than Turkish. According to the information received, there are approximately 98 female in İnaç neighborhood. Therefore, the female population in İnaç neighborhood, which is affected by the sub-project, constitutes 43% of the total population. The literacy rate of women in the region is very low. Therefore, it is difficult for women to participate in stakeholder engagement activities. In addition, the presence of women in the public sphere in the region is limited. In order to inform them about stakeholder engagement activities, verbal information will be provided to women parent groups in Quran courses and primary and secondary schools in the neighborhood.

Programs will be developed so that the vulnerable and disadvantage groups, whose details are provided in Table 2 do not have difficulties in participating in the consultation activities and events. A shuttle service will be provided to ensure that the said group participates in the consultation meetings. They will be picked up from their homes and returned to their homes upon completion of the event.

How each stakeholder group will be affected by the project and their interest in the project; the area of influence and the nature and quantity of the impacts that may arise were determined. The stakeholders determined as a result of the interviews with the mukhtar of İnaç neighborhood and local people, interviews with non-governmental organizations, public institutions and organizations and the information obtained from Çankırı Municipality are given in Table 3.

*Table 3. Influence/Interest Table for Stakeholder Prioritization*

Stakeholder Group			Level of Interest	Level of Influence
Stakeholder	Project Affected Parties	<ul style="list-style-type: none"> <li>Communities likely to be affected by the construction works in the scope of component (İnaç Neighborhood)</li> <li>Workers to be employed for the construction activities</li> </ul>	High	High

## 4. STAKEHOLDER ENGAGEMENT PROGRAM

The main objectives of the stakeholder engagement programme and the planned timetable for the various stakeholder engagement activities are to define at what stages and at what intervals these activities will be carried out throughout the life of the sub-project. Information is provided on how the public will be made aware of future opportunities to review information and provide their views, if decisions about public meetings, locations and timing of meetings have not yet been made.

### 4.1. Summary of stakeholder engagement done during subproject preparation

In order to inform the public about the sub-project, a field visit was carried out on 01.02.2025 to engage with the local community, gather their opinions and suggestions, and provide detailed information about the project. As part of this process, an interview was conducted with İnaç neighborhood mukhtar and Çankırı Municipality officials about the usage status of the sub-project site and the disadvantaged groups living in the region. Within the scope of the interviews;

It was determined that the sub-project site was not currently used by the local people for any purpose, and that there were no refugees or child-headed people living in İnaç neighborhood, the closest settlement to the sub-project site.

The mukhtar, local authorities and local residents were questioned about the existence of cultural heritage. No tangible or intangible cultural heritage assets were identified in the sub-project site and within the influence area.

In addition, within the scope of the Stakeholder Engagement Plan, consultation meetings were held with Çankırı neighborhood residents (4 people) and the association president by CA Engineering authority on 01.02.2025. In order to obtain general information about the socio-economic situation of İnaç neighborhood and to learn about their knowledge levels about the sub-project, the mukhtar of a "Community Level Survey" form was filled out by the consultant company as a result of interviews with the mukhtar of İnaç neighborhood.

During consultations with the local community, it was observed that they were aware of the potential environmental and social risks associated with the existing SPP but did not have any concerns. They expressed their support for the new SPP and emphasized the importance of utilizing renewable energy sources for the development of the region and the country. Information was provided about the Çankırı Municipality grievance mechanism, which they can use to share any opinions or complaints during both the construction and operation phases of the sub-project. Overall, the consultations indicated that the local community is well-informed about the sub-project activities, potential environmental and social risks, and the available grievance mechanisms.

As part of the stakeholder engagement efforts for the Çankırı Municipality Solar Power Plant Project, a Public Consultation Meeting was held with the participation of local residents, municipal representatives, and other relevant stakeholders on 26.09.2025. The purpose of the meeting was to inform the community about the sub-project, provide a platform for discussion, and collect feedback regarding potential environmental and social impacts.

Prior to the meeting, announcements were made through local channels such as neighborhood mukhtar and municipal communication tools to ensure broad community awareness and encourage participation. A total of 20 people attended the meeting, including mukhtar of İnaç neighborhood and 19 local residents, representing the primary stakeholders in the sub-project area.

During the session, detailed information was shared on the location of the project site (neighborhood, block, and parcel), the scope of the solar power plant, its technical components, installed capacity, anticipated energy generation, and the expected contribution to carbon emission reduction. The use of municipal lands and compliance with legislative obligations were also explained.

Potential environmental and social impacts—particularly during the construction phase, such as dust, noise, and increased traffic—were discussed in detail. Participants were informed about the environmental and social mitigation measures outlined in the Environmental and Social Management Plan (ESMP), and the available grievance mechanism throughout the project lifecycle was introduced.

During the session, participants raised questions about the project's benefits to local communities and whether local jobs would be created. These questions were addressed in detail by project representatives, who emphasized that all feedback received would be considered during project implementation.

Overall, the consultation contributed to strengthening community awareness, promoting transparency, and demonstrated the municipality's commitment to ongoing stakeholder engagement. A copy of the meeting minutes, the signed participant list, and photographic documentation are provided in Annex-F.

## **4.2. Summary of sub-project stakeholder needs and methods, tools, and techniques for stakeholder engagement**

Identifying and managing stakeholder needs accurately in sub-project is critically important. Key stakeholder needs include regular updates about the sub-project, stakeholders in decision-making processes, direct or indirect benefits from the sub-project, and an effective communication mechanism. Tools such as surveys, workshops, and one-on-one interviews will be effectively utilized in information-sharing and engagement processes. Additionally, regular reporting, dashboards, and online communication tools will ensure transparent updates about sub-project progress. Community meetings and feedback mechanisms will help build trust in the sub-project while providing a better understanding of stakeholders' needs and expectations. Through these methods, stakeholder engagement in sub-project will be strengthened, making the projects more inclusive, sustainable, and effectively managed.

Stakeholders have been identified within the scope of the sub-project and consultations or key information meetings have been held with these stakeholders. Stakeholders identified in the region have been informed about the location, components and content of the sub-project.

This plan shows the nature and level of stakeholder interest in the project, how the engagement will be conducted, the frequency of engagement and the responsible unit of Çankırı Municipality, and the following matrix provides a tabular version of this program (See Table 4).

The responsible party/person should be determined by the representatives of Çankırı Municipality. The SEP will be implemented at the sub-project level. Consultation forms and full meeting minutes of those who participated in the consultations will be recorded, but will not be made publicly available as an annex to the SEP. When the SEP is disclosed, relevant data containing personal data will be blurred, taking into account the Personal Data Protection Law.

All supporting documentation for stakeholder activities (newspaper notices, attendee list, full meeting minutes (as an annex), sample brochure) will be included in the SEP.

The Minutes of Public Consultation Meeting (MoM) meetings to be held within the scope of the sub-project will be held face to face. A shuttle service will be provided to ensure the participation of vulnerable groups, and online participation will be provided for groups that still cannot participate.

In the participation of women in consultation activities, meetings will be held under conditions that take cultural sensitivities into account. In addition, meetings will be planned at appropriate times (e.g. evenings or weekends) depending on their age and workload.

## **4.3. Stakeholder engagement plan**

The main objectives of the stakeholder engagement program are to provide early information, explanation and consultation on various sub-project documents and activities in order to establish a dialogue with project stakeholders from planning to implementation and operation.

Çankırı Municipality will ensure that the sub-project is communicated to all stakeholders and that meaningful engagement and consultation activities are carried out. Consultation activities are designed with some basic guiding principles, including the following:

- Consultations should be widely advertised, especially among stakeholders, preferably one week before any meeting or engagement.

- A non-technical briefing should be provided prior to any event to ensure that people are informed about the assessment and results prior to the planned meetings.
- The location and timing of meetings should be designed to maximize stakeholder engagement and compliance.
- The information provided should be clear, non-technical and in all appropriate local languages where necessary.
- Engagement should be facilitated so that stakeholders can voice their views and concerns.
- Any issues that arise should be addressed in the meetings or at a later time.

The following information should be included when documenting the stakeholder engagement activities to be carried out within the scope of the sub-project:

- Date(s) and location(s) of the consultation(s) and related notification(s) (newspaper advertisements, screenshots of social media announcements, etc.)
- Participant details (as per the Personal Data Protection Law),
- Meeting schedule/program (as well as information on what was presented and by whom),
- Summary meeting minutes (comments, questions and responses from presenters),

Review of comments, agreed actions, issues requiring follow-up actions and activities, including clarification of how stakeholders were informed about decisions taken.

Çankırı Municipality will make the subproject E&S documents available in both Turkish and English on its website<sup>2</sup>. These documents can also be accessed at the Çankırı Municipality. Furthermore, subproject posters and information on the grievance mechanism will be displayed at local points, including the Mukhtar's Office in İnaç Neighborhood. Stakeholder consultations will be conducted to review the draft E&S documents before they are finalized and disclosed. This process ensures that stakeholders insights and concerns are valued and integrated, fostering a more effective and inclusive outcome.

The proposed Stakeholder Engagement Schedule is provided in Table 4.

## 4.4. Reporting back to stakeholders

Stakeholder engagement is a continuous process that begins before the development of the SEP and will continue throughout the life of the sub-project. Çankırı Municipality will actively communicate with the identified stakeholders throughout the life of the sub-project. In particular, Çankırı Municipality will solicit feedback from stakeholders on the E&S performance of the subproject and the implementation of the identified mitigation measures and the Grievance Mechanism. In the event of significant changes in the subproject that lead to risks and impacts that will particularly affect the parties affected by the subproject, Çankırı Municipality will provide information on these risks and impacts and consult with the parties affected by the sub-project on how to mitigate these risks and impacts.

Different information methods and tools can be used to increase the level of information for each of the targeted stakeholder groups. In particular, for public engagement meetings, the meeting place(s), time and date will be set and this information will be announced to the public at least ten (10) days before the meeting, ensuring that all community members are informed about the meeting to be held.

Below is the minimum requirements for the content of the Minutes to be prepared after each stakeholder engagement activities and meetings:

- Location of consultation(s)/event,
- Date(s) of consultation(s)/event,
- Details on attendees (as appropriate),
- Meeting/Event Program/Schedule: What is to be presented and by whom,
- Meeting Minutes (Comments, Questions and Response by Presenters and Photos from the meeting), and
- Agreed actions.

The PMU will take special measures to ensure that vulnerable and disadvantaged individuals/groups have equal opportunities to access information, provide feedback or voice their grievances.,

In addition, the timing of these meetings for stakeholders who are working will be arranged in a way that they can also participate in the consultation events or alternative solutions will be produced for them. The following additional support or resources will be provided for these people to participate in stakeholder engagement activities. The following measures should be taken at this point:

- Providing written materials related to sub-project information in larger fonts and Braille,
- Selecting accessible venues for consultation events and/or providing transportation for people in remote areas (e.g. villages),
- Organizing small events or meetings for vulnerable/disadvantaged people depending on their sensitivity (e.g. a small meeting with hearing impaired individuals accompanied by a sign language expert),
- Organizing events/meetings or consultation processes with vulnerable/disadvantaged individuals/groups in cooperation with relevant NGOs (if any) (e.g. organizing a meeting/event for the physically disabled with the help of the Solidarity Association for the Physically Disabled),
- The timing of the consultation events should be arranged in a way that working stakeholders can participate.

For those who are unable to attend despite the scheduled time, brochures, an active web page, social media, face-to-face individual meetings, etc. can be organized.

Throughout all stages of the sub-project, comments collected through the website, grievance mechanism, and all stakeholder engagement activities such as public and/or individual meetings will be subject to evaluation and review by the relevant responsible personnel such as the GM Contact Person (GMCP) and the Public Relations Assistant to be assigned by the Project Management Unit (PMU).

The contractor and Çankırı Municipality officials will be in regular contact. Face-to-face meetings will be held when necessary, and the contractor and Çankırı Municipality will meet periodically (monthly).

Depending on their content, comments will be evaluated and reviewed both within the PMU and by the relevant responsible personnel of the contractor(s).

If the request or comment cannot be met with the solution method proposed by the commenter or requester to resolve the grievance, alternative solutions will be sought (see Section 6 for more details). A decision will be made as a result of the evaluations and if the final decision cannot be met within a reasonable time frame, it will be communicated to the stakeholder(s) who made the comment or request, together with the justifications and the timeline of actions related to the comment/request. If the comment is not anonymous, the final decision will be communicated to the stakeholder(s) through the communication channel(s) preferred by the stakeholder(s). In addition, a Grievance Close Out Form (see Annex-B) should be filled in and signed by the stakeholder(s).

Stakeholders will be informed as the sub-project develops, including reporting on the environmental and social performance of the sub-project, implementation of the SEP and the grievance mechanism.

During the construction phase, voice announcements will be made by Çankırı Municipality and/or Contractors two (2) days in advance for road restrictions and other infrastructure service limitations. Environmental and social performance indicators will be shared with stakeholders monthly via Çankırı Municipality's website<sup>3</sup>.

The commencement and completion of the construction activities of the sub-project, changes in the sub-project design and important stages such as commissioning will be communicated to stakeholders through local media channels as much as possible.

According to the Environmental and Social Management Framework prepared for Çankırı Municipality, after the finalization of the ESMP, a consultation meeting is required to be held with the all stakeholders determined during the stakeholder identification .

---

<sup>3</sup> <https://cankiri.bel.tr/>

## 5. RESOURCES AND RESPONSIBILITIES FOR IMPLEMENTING STAKEHOLDER ENGAGEMENT ACTIVITIES

### 5.1. Project Implementation Unit (PIU)

PIU will be established within Çankırı Municipality and will consist of Çankırı Municipality personnel. The duties and responsibilities of PIU are explained in Table 5.

A sufficient budget will be allocated for communication and grievance resolution mechanism to be established with stakeholders. The budget is included in the project budget.

### 5.2. Resources

Çankırı Municipality is ultimately responsible for the environmental and social performance of the entire sub-project, including the performance of its own contractors and other contractors. A Project Implementation Unit (PIU) will be established to carry out operational and administrative tasks. The PIU staff will be Çankırı Municipality's own staff.

The PIU will be primarily responsible for coordinating stakeholder engagement activities. The collection of grievances, questions and feedback will be the direct responsibility of the PIU's GM contact (GMCP) and the Contractors' E&S Specialist.

The resources to be provided by Çankırı Municipality are as follows:

- A sub-project-specific area on the Çankırı Municipality's official website,
- An electronic database for grievances,
- Stakeholder engagement records,
- Printed documents (guides, brochures, posters, etc.) to be used in accordance with the SEP requirements.

### 5.3. Management functions and responsibilities

Çankırı Municipality/PIU will be the main party responsible for the implementation of the SEP and coordination with contractors, implementation, monitoring and reporting. Detailed roles and responsibilities regarding the stakeholder engagement of the sub-project are provided in Table 5.

*Table 5. Roles and Responsibilities*

Responsible Entity	Roles and Responsibilities
PIU of Çankırı Municipality	<ul style="list-style-type: none"><li>• Planning and implementation of the SEP;</li><li>• Leading stakeholder engagement activities in close collaboration with the ILBANK PMU;</li><li>• Management and resolution of grievances;</li><li>• Consultation on specific SEP activities;</li><li>• Announcing the important construction activities (such as road closures and service interruptions);</li><li>• Reporting on implementation of SEP activities to ILBANK PMU;</li><li>• Executing defined grievance mechanism in the SEP properly and informing ILBANK PMU about the overall implementation status.</li></ul>
E&S Consultant	<ul style="list-style-type: none"><li>• E&amp;S Consultant is responsible for preparing the Environmental and Social Assessment Study Reports, i.e. ESMP and SEP, for the approval of ILBANK</li></ul>

Responsible Entity	Roles and Responsibilities
	<ul style="list-style-type: none"> <li>• Taking a part in organizing the ESMP introduction meeting to be held for the public and NGOs as part of the Sub-project; and</li> <li>• Finalizing the reports as per the concerns/opinions of the stakeholders.</li> </ul>
Supervision Consultant	<ul style="list-style-type: none"> <li>• Review the SEP document to redefine the stakeholders directly or indirectly affected and/or interested in the sub-Project and to follow up the implementation of the methods, instruments, timing and participation levels identified in the SEP,</li> <li>• Interviews Çankırı Municipality PIU and others involved in the stakeholder engagement process to review progress and identify critical issues,</li> <li>• Consults with affected households and community leaders through key informant interviews to identify their feedback on stakeholder engagement performance of the Project,</li> <li>• Interacts with various stakeholders to get their views on SEP implementation,</li> <li>• Controls whether the necessary trainings are given to the personnel who will work during the construction phase,</li> <li>• Reviews grievance records to identify significant non-compliances or recurring issues with stakeholder engagement and other project activities and to reveal actions,</li> <li>• Monitors and reports on progress made in relation to the commitments defined in SEP.</li> </ul>
Contractor	<ul style="list-style-type: none"> <li>• Implements and develops Contractor's social policy,</li> <li>• Provides necessary resources for proper remedial actions,</li> <li>• Follows up of the complaints and informs CLO about the solution process,</li> <li>• Consults with the project affected communities about grievance mechanism, entitlements, construction works and schedule, community safety, compensation of economic losses as needed in coordination with CLO and Social Expert of PIU,</li> <li>• Keeps records of complaints and participation activities when necessary and forward them to CLO and Social Expert of PIU,</li> <li>• Reports grievances to GM Team,</li> <li>• Submits monthly Environmental and Social Monitoring Reports (ESMRs) to Çankırı Municipality (CLO related parts).</li> <li>• The construction contractor should develop monthly ESMRs and submits to Municipality through the Supervision Consultant..</li> </ul>

## 6. GRIEVANCE MECHANISM

The purpose of the Grievance Mechanism (GM) is to assist to resolve complaints and grievances in a timely, effective, and efficient manner that satisfies all parties involved. The purpose of the public grievance mechanism and the workers grievance mechanism is to provide access to a grievance resolution procedure for Subproject affected people, including communities and Subproject workers. Managing, preventing, minimizing and effectively addressing grievances are an integral part of a sound stakeholder engagement strategy. Engagement also helps to anticipate and review community concerns and prevent them from turning into grievances. Therefore, according to the WB, the following Grievance Mechanism (GM) will be implemented by Çankırı Municipality/PIU throughout the life of the sub-project, including pre-construction, construction and operation phases. In the GM, comments/grievances will be received in Turkish, since everyone in the developed settlements speaks Turkish, there will be no need to use another language. The grievance channels used in applications will be published in Turkish. GM forms and consultation records will be kept in Turkish.

### 6.1. Grievance Mechanism at National Level

ILBANK established a transparent and comprehensive Grievance Mechanism (GM) in September 2021 to receive, assess and resolve grievances related to each international project it finances and will be in place throughout the life cycle of this subproject. Stakeholders may, if they wish, submit their comments, suggestions and grievances to ILBANK through the following means of communication:

Website: <https://www.ilbank.gov.tr/form/bilgiedinmeuluslararasi>

E-mail: [bilguidb@ilbank.gov.tr](mailto:bilguidb@ilbank.gov.tr) ve [etikuidb@ilbank.gov.tr](mailto:etikuidb@ilbank.gov.tr)

Phone Number: +90 312-508 79 79

Address: ILBANK International Relations Department, Emniyet Mahallesi, Hipodrom Caddesi, No:9/21, Yenimahalle/ANKARA

Presidential Communication Center: The Presidential Communication Center (CIMER) provides a centralized grievance system for Turkish citizens, legal entities and foreigners. The Presidential Communication Center (CIMER) will serve as an alternative and well-known channel through which sub-project stakeholders can directly communicate their grievances and feedback regarding the sub-project to government officials.

- [www.cimer.gov.tr](http://www.cimer.gov.tr)
- Call Centre (hotline): 150
- Phone number: +90 312 525 55 55
- Fax number: +90 0312 473 64 94
- Address for Official Letter/Petition: Republic of Türkiye, Directorate of Communications Kızıllırmak Neighborhood. Mevlana Boulevard No:144 Cankaya/ANKARA

Mail addressed to Republic of Türkiye, Directorate of Communications

Individual applications at the community relations desks at governorates, ministries and district governorates.

Foreigners Communication Center (YIMER) will be available to Project stakeholders as an alternative and well-known channel for conveying their Project-related grievances and feedback directly to state authorities.

- [www.yimer.gov.tr](http://www.yimer.gov.tr)
- Call Centre (hotline): 157
- Phone number: +90 312 515 11 22
- Fax number: +90 0312 920 06 09

- Address for Official Letter/Petition: Republic of Türkiye, Directorate General of Immigration Management Camlica Neighbourhood No: 4 Yenimahalle/ANKARA

Mail addressed to Republic of Türkiye, Directorate General of Immigration Management

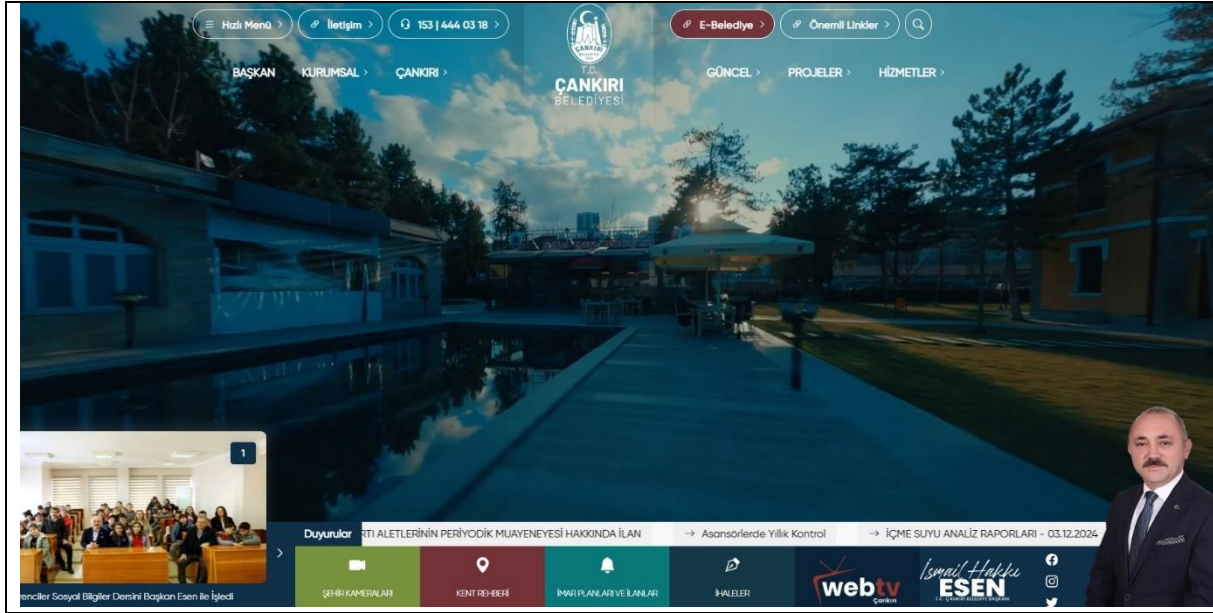

Individual application to the General Directorate of Migration Management of the Republic of Türkiye

## 6.2. Sub-Project Level Grievance Mechanism

As part of the stakeholder engagement, information and consultation process, stakeholders should be informed about project level grievance mechanism. The purpose of the grievance mechanism is to provide channels free from manipulation, coercion and intimidation through which local community members can submit their demands, concerns and complaints regarding the sub-project and its impacts. Responding to and resolving complaints in a timely, proactive, impartial, effective and efficient manner is essential according to international standards and requirements regarding stakeholder engagement. In particular, it provides a transparent and reliable process for fair and sustainable results. In this way, mutual trust and cooperation can be developed between the sub-project stakeholders and Çankırı Municipality through corrective actions. The main components of a successful grievance mechanism include the principles of anonymity, confidentiality and transparency.

Çankırı Municipality website includes a communication page, which is the mechanism where grievances/requests regarding Çankırı Municipality activities are submitted and the resolution process is followed (see 3). In addition, many sections of the homepage of Çankırı Municipality website include information about social media accounts and telephone numbers (such as the Alo 153/ 444 03 18 line) to which grievances can be submitted.

- Çankırı Municipality's Website: hilalmasa@cankiri.bel.tr
- Çankırı Municipality's Call Centre (hotline): ALO 153/ 444 03 18
- Çankırı Municipality's Address: Cumhuriyet Mah. Atatürk Bulvarı No: 15 ÇANKIRI

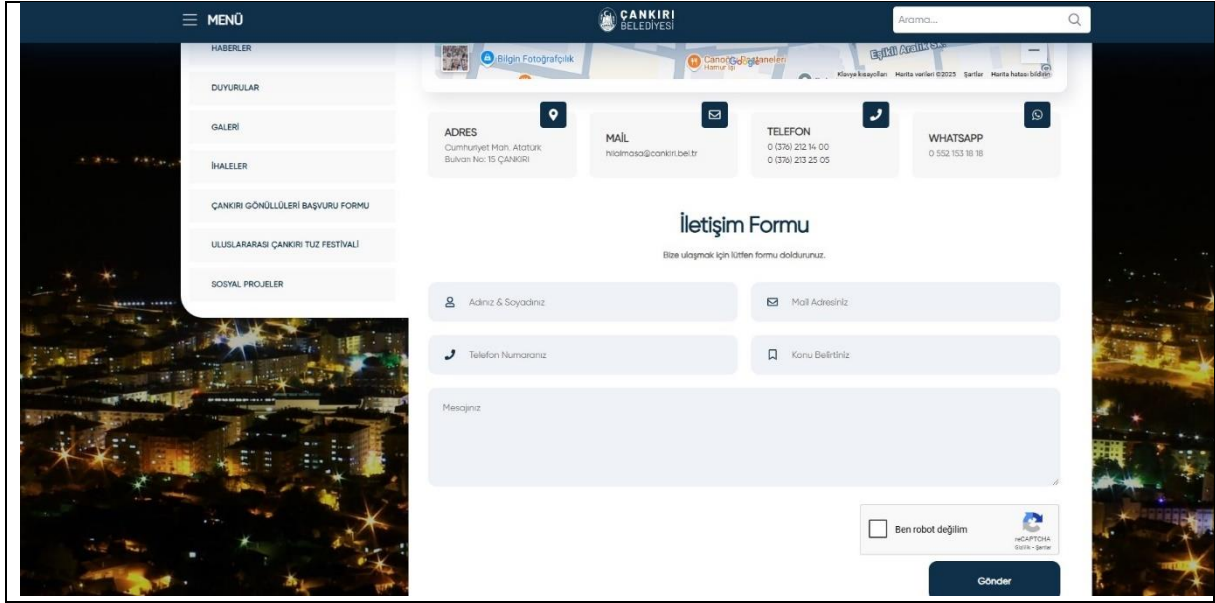

Figure 3. Çankırı Municipality Website

The grievances, requests, suggestions and opinions of the public will be recorded through the GM contact person (GMCP) to be assigned by Çankırı Municipality. All grievances are examined to be classified according to whether they are real or not and whether they are related to sub-project activities. If a grievance is deemed unsuitable for investigation because it is not genuine or not related to sub-project activities, the complainant will be provided with an explanation as to why the grievance could not be followed up. Grievances received within Çankırı Municipality are evaluated and forwarded to the relevant units. Appropriate grievances are responded to according to the sub-projects social and environmental requirements defined in the ESMP and SEP.

All grievances received through direct phone calls, e-mails, face-to-face meetings/communications and the Website are recorded and after the recording process, will contact the complainant to explain the sub-project response process and the resolution of the grievance within ten (10) business days. The development of the solution may require consultation with the relevant person(s). The requester will be informed about the methodology followed. Each request must be evaluated with the utmost care, diligence, fairness and impartiality. The proposed solutions are communicated to the complainant with a second notification. If the proposed solution is accepted by the complainant, Çankırı Municipality PIU will handle the grievance within 15 business days and take corrective measures to resolve the grievance. Grievance registration forms will be sent to the relevant GM Team member (Social Expert of the PMU Team or E&S Expert of the Contractor) on the same day (if possible, as soon as the grievance is received). A notification should be sent to the complainant by GMCP within two (2) business days of the receipt of the grievance, indicating that the grievance has been received and evaluated. The PIU Team will also have access to the grievance record to be created within the scope of the sub-project and will be continuously updated by GMCP or PMU Social Expert. The Grievance Tracking Table will include the complainant/suggestor information, the date of receipt of the grievance/suggestion, the date and method of feedback to the complainant, the current status of the grievance (open, under review, closed, rejected) and the explanation of this current status (e.g. why it was rejected). It will include the closing/rejection and feedback dates. Grievances from contractors and subcontractors will be forwarded to GMCP by the Contractors' E&S Specialist and will be recorded by GMCP using the grievance registration forms. On the same day, the data will be entered into the Grievance Registry and Grievance Database and made accessible to the PMU Team. During this period, the relevant parties responsible for managing the grievance will be in constant communication with the complainant and all communication will be recorded in the GM system through the Consultation Forms (see Annex-D). The grievance will be closed after the implementation of the decision is completed. After the grievance is closed or resolved, the complainant will be informed with the third notification and the relevant records (Grievance Closure Form, Grievance Record, etc.) will be kept. Unless an alternative agreement is made with the complainant, grievances will be closed within thirty (30) business days from the date of application. If the grievances are not resolved within thirty (30) business days, the extenuating circumstances will be documented and reported. After the grievance is resolved and the result is communicated to the complainant, the appointed GMCP will obtain the necessary signatures and close the

grievance by filling out the Grievance Close Out Form (see Annex-B). If the decision is not accepted, it will be reconsidered and a revised decision may be proposed. Ultimately, the PIUs will be responsible for consolidating, monitoring and reporting the requests received, resolved and pending regarding the project. All this data will be compiled by the PIU to be reported at the end of each month.

Çankırı Municipality/PIU Team will also implement additional measures to manage sensitive and confidential complaints, including those related to Sexual Exploitation and Abuse/Harassment (SEA/SH), in accordance with the World Bank ESF Good Practice Note on SEA/SH.

### **6.3. Grievance Mechanism for Workers**

The GM for employees (applicable to both Çankırı Municipality personnel and contractor and subcontractor employees) has been established in accordance with WB ESS2. The implementation of the GM for employees will be ensured throughout the financing life cycle of the sub-project. PIU requests contractors to develop and implement a grievance mechanism for the workforce, including sub-contractors, before starting work. Sub-contractors will prepare labor management procedures that will include a detailed description of the grievance mechanism for employees.

Employees are informed about employee rights, basic occupational health and safety, the grievance mechanism and its operation at the time they start work. An up-to-date list of contact points is available in employee handbooks and/or bulletin boards. All processes related to the grievance mechanism are conveyed in a language that employees can understand.

When employees detect a hazard or risk for which no precautions have been taken regarding occupational health and safety, they inform the employee representative, occupational safety specialist and/or occupational physician selected by the employees about this hazard or risk. The employee representative shall forward the details of the hazard and risk to the occupational health and safety board, if any, or to the employer/employer's representative, and request an evaluation. If the problem is not resolved, all legal rights are reserved by applying to the contractor/subcontractor level GM contact persons through the grievance boxes located at the workplaces. Requests regarding employee rights and occupational health and safety are collected in grievance boxes placed in areas that employees can easily access.

The collected grievances and suggestions are carried out in accordance with the periods determined in the process of the grievance mechanism.

After the applications are evaluated, if there is an imminent, urgent and vital danger, a notification can be made directly to the Labor Life Communication Center, ALO 170 line or the Provincial Labor and Employment Institutions Directorates operating in the province. Upon receipt of the requests, the workflow grievance mechanism is carried out in accordance with the workflow chart.

The Çankırı Municipality/PIU Team will be ready to handle grievances regarding working conditions. The Çankırı Municipality/PIU Team will evaluate grievances and suggest solutions for direct and contracted employees using this internal GM, which all sub-project employees can easily access.

### **6.4. Grievance Mechanism Flow Chart**

Grievance mechanism operation diagram details are given in Table 6.

Table 6. Grievance Mechanism Flow Chart

Grievance Process	Requirement / Action
Submission of a grievance	Receiving the grievance by any communication channel explained above. (At this point, if the grievance is a sensitive grievance involving child abuse, sexual harassment abuse or Gender Based Violence (GBV) immediate action will be taken within 2 days after receiving of the grievance. For the cases relevant to sexual exploitation and abuse/sexual harassment at workplace or any potential child abuse in the project sites, the grievance will be directed by the GM focal point (based in ILBANK headquarter) to relevant legal authorities/service providers such as Ministry of Family and Social Services and Prosecutors Office.")
Registration of grievance	Registering/recording through making an entry in the sample grievance register table. All the grievances will be registered within two working days and feedback will be given to the complainant. If the complainant requests that this grievance be treated anonymously, this grievance will be recorded anonymously and the request will be met.
Forwarding of grievance	The grievance is forwarded to relevant persons (site manager on construction sites and experts of the PIU) responsible for handling the grievance in not later than three working days upon receiving the grievance (except for any emergent grievance, which would be handled as appropriate).
Evaluation of a grievance	Evaluating the grievances within 10 working days and determining whether the grievance meets the admissibility criteria. If the grievance is not valid, providing relevant explanation to the complainant.
Response for a grievance	<p>If the grievance is valid, identifying and taking corrective measures for resolving the grievance in not later than 15 working days upon receiving.</p> <p>All comments and grievances will be responded to either verbally or in writing, in accordance with the preferred method of communication specified by the complainant, if contact details of the complainant are provided.</p> <p>At this point, it should be noted that the action taken and the result of this anonymously recorded grievance should be shared on the Çankırı Municipality website, so that anonymous complainants is informed about their grievance and the results.</p>
Recording the result of a grievance	Recording the result of the grievance in register table.

Grievance Process	Requirement / Action
Right to Appeal	<p>If the grievance cannot be resolved with the existing process, applicants can always apply to relevant legal institutions. Such institutions can be summarized as follow:</p> <ul style="list-style-type: none"> <li>• Civil Courts of First Instance</li> <li>• Administrative Courts</li> <li>• Commercial Courts of First Instance</li> <li>• Labor Courts, and</li> <li>• Ombudsman (<a href="https://ebasvuru.ombudsman.gov.tr/">https://ebasvuru.ombudsman.gov.tr/</a>)</li> </ul>

## **7. MONITORING AND REPORTING**

### **7.1. Summary of how SEP implementation will be monitored and reported**

It is the responsibility of Çankırı Municipality to ensure that the SEP is fully integrated and implemented in all sub-project activities. All stakeholders will be consulted and will be able to use the GM throughout the sub-project lifecycle. On the other hand, the SEP will form part of all tender documents related to the physical works within the scope of the sub-project.

As part of the World Bank ESF requirements, the draft ESMP and draft SEP will be made public when approved for public disclosure and approved by İLBANK, and the disclosure will be the responsibility of the sub-project Implementers and the consultant firm Çankırı Municipality. Çankırı Municipality will ensure that the SEP is published in hard copy and on its website. Similarly, several copies of all prepared environmental and social documents will be available locally in Çankırı Municipality, where affected groups such as the Mukhtar offices operating in the Central District of Çankırı Province and local NGOs can easily access. The SEP is a dynamic document and will be reviewed, updated and approved by İLBANK when necessary (e.g. changes in the design of sub-project components according to Environmental and Social Monitoring Reports (ESMRs), stakeholders' requests/grievances regarding the sub-project. Implementation of the SEP throughout the implementation of the sub-project, elimination of non-conformities, etc.). Çankırı Municipality will be responsible for making a statement through communication channels for each updated version of the SEP.

Çankırı Municipality will monitor the sub-project throughout its lifetime considering the stakeholder engagement process. The approved SEP will be reviewed biannually and updated if required according to the project improvements and the unexpected public reactions. The GM established by the Çankırı Municipality will be used effectively and the statistical summary of the outputs of GM will be reported to İLBANK together with all the requests received, resolved and unresolved, Grievance Register, Grievance Monitoring Table and Environmental and Social Monitoring Reports (ESMRs) on a monthly basis. With monthly reporting, total number of grievances, monthly number of grievances, distribution of grievances by subject, gender, grievances answered within 1 days, grievances resolved within 30 days, list etc. is necessary.

### **7.2. Reporting back to stakeholder groups**

The PIU Team will systematically record and report feedback received from communities, local governments, landowners, other companies, NGOs, media, academic institutions and other interest groups through an effective consultation and grievance mechanism to İLBANK.

The PIU Team will submit feedback and grievances, as well as a statistical and qualitative analysis of their results, to the Supervisory Consultant on a monthly basis, who will review and distribute them to İLBANK PMU. In addition, relevant grievances and their actual status will be reported in the ESMRs. Only the necessary information regarding the grievance will be included in the reports, and any personal information belonging to the persons using the ESMR will be kept confidential and will not be shared in these reports.

During the sub-projects' development and construction phases, the construction contractors will prepare brief monthly reports on environmental and social performance for Çankırı Municipality which will include an update on implementation of the stakeholder engagement plan and include indicators in this section. The construction contractors will record SEP activities with monthly and quarterly reports and submit them to Çankırı Municipality and İLBANK

Çankırı Municipality's PIU, will report back to stakeholder groups, primarily through public engagement meetings in project affected municipalities and/or Neighborhoods. Minutes of meetings will be shared participants during subsequent public meetings. The summary will be published after removing identifying information on individuals to protect their identities in accordance with the Law on the Protection of Personal Data. Feedback received through the GM will be responded to in writing and verbally. Key sub-project updates will be posted on Çankırı Municipality's website.

The summary will be published after the identity information of the persons is removed in order to protect their identity in accordance with the Personal Data Protection Law.

Çankırı Municipality will work with a consultant if necessary to carry out social and environmental monitoring activities. The Supervisor Consultant will monitor whether the environmental and social issues specified in the SEP and ESMP documents are implemented throughout the sub-project lifecycle and report to Çankırı Municipality.

**Meeting Time: 14:00**

**Meeting Venue: İnaç Village Social Facility**

## STAKEHOLDER CONSULTATION MEETING

The Çankırı Municipality Solar Power Plant Project is among the subprojects under the Türkiye Public and Municipal Renewable Energy Project (PUMREP), which has been developed to support sustainable development in cities across Türkiye.

Within the scope of the subproject, the Environmental and Social Management Plan Checklist (ESMP-Checklist) and the Stakeholder Engagement Plan (SEP) were prepared in compliance with Turkish environmental and social legislation, the World Bank Environmental and Social Standards, Safeguard Policies, the World Bank General EHS Guidelines, the Industry Sector Guidelines, as well as İLBANK's Environmental and Social Management System (ESMS).

As part of the stakeholder engagement and disclosure process, a Stakeholder Consultation Meeting was held on 26 September 2025 at 14:00 in the İnaç Village Social Facility. To inform the local community about the meeting, printed materials such as brochures and posters were prepared and displayed, and announcements were made on the Çankırı Municipality website, as well as in local and national newspapers. In addition, meeting information was also communicated to the local community via SMS.

### Meeting Summary

The Stakeholder Consultation Meeting was initiated with the opening speech of the Deputy Mayor of Çankırı Municipality. Subsequently, a representative of the consultant company provided detailed information on the process and content of the reports prepared for the implementation of the sub-project. A presentation was delivered highlighting the benefits that the sub-project would bring to the municipality and the local community. The presentation is shared in Annex-7: Stakeholder Consultation Meeting Presentation.

The meeting was attended by a total of 20 participants, including mukhtar of İnaç neighborhood, and 19 local residents. Among the participants, 20 were male. Individuals who arrived late or left early were not included in the signature sheet. Those who departed before their turn to sign, or who joined after the signing order had passed, were not recorded.

During the meeting, information was provided regarding the location of the subproject (neighborhood, block, and parcel), sub-project capacity, equipment to be used, technical specifications, and the annual energy production. It was also confirmed that regulatory obligations were fulfilled.

Within the scope of the MoM, the consultant company presented the environmental and social risks identified in the ESMP Checklist List and Stakeholder Engagement Plan, the mitigation measures planned to address these risks, the geographical and climatic characteristics of the subproject area and their potential impacts on the subproject, as well as analyses conducted on possible natural disasters.

In addition, participants were informed about the grievance mechanisms that can be used to submit complaints, concerns, suggestions, or opinions during the pre-construction, construction, and operational phases. Based on the information provided, the meeting concluded with a Q&A session and lasted approximately one hour.

#### Question and Answer Section

<b>Question 1</b>	
Name / Occupation	İnaç Neighborhood Resident
How will the local community benefit from this project?	
<b>Answer 1</b>	
Name / Occupation	CA Engineering
Local residents will be given priority for employment, and supporting services such as catering and maintenance will be sourced from local businesses, providing direct economic benefits. As the road and security infrastructure already exist, no additional burden will occur, while the project will also contribute to local economic activity and community development.	

<b>Question 2</b>	
Name / Occupation	İnaç Neighborhood Resident
Can local residents be employed in the project?	
<b>Answer 2</b>	
Name / Occupation	CA Engineering
Yes, local residents can be employed in the project, and priority will be given to hiring from the local community wherever possible.	

#### Meeting Conclusion

The Stakeholder Consultation Meeting, which lasted approximately one hour, included a presentation by representatives of the consulting firm providing information about the subproject. Following the presentation, a question-and-answer session was conducted to gather participants' views and inquiries. During the meeting, information was shared regarding the environmental, social, and economic aspects of the Çankırı Municipality PV Project, as well as the next phase of the sub-project. In addition, participants were informed about the grievance mechanism available for submitting complaints, requests, or suggestions throughout the subproject duration. The meeting concluded after collecting participants' feedback and recommendations.

## Göktaş: 1 milyondan fazla kadına ulaştık

Aile ve Sosyal Hizmetler Ba-  
kanı Mahir Üzümlü Göktaş,  
diren eğitimlerle bugüne kadar 1  
milyondan fazla kadına ulaştık.  
Kadınları desteklemek amacy-  
la sivil toplum kuruluşlarımızda  
ve özel sektörde iş birliklerini  
önemsiyoruz. Birlikte çalışmaları  
yürüten kadınların ekonomik  
hayatına katılmaları artırmada kritik  
rol oynadığını inanıyoruz" dedi.

Bakan Göktaş, kadın giri-  
şimcilerin sunulan desteklerle  
kurdıkları işlerini büyütür  
markalarını güçlendirdiğini ifade  
ederken, "Kadınların girişimci-  
lik alanındaki yükselişi sadece  
ekonomik bir hareket değil. Aynı  
zamanda toplumsal dönüşümün  
de önemli bir parçasıdır. Araş-  
tırmalar gösteriyor ki kadınların  
kendi işlerini işletmelerde elde ettikleri  
gelirleri daha geniş bir sosyal  
faaydaya dönüştürme eğiliminde  
bulunuyor. Bunun yanı sıra başları  
yükleniyor başka kadınlara ve  
gençlere de yol açıyor, onlara  
cesaret veriyor. Tipki bugün  
burada aramızda bulunan siz  
kymetli girişimciler ve kooperat-  
if temsilcilerimiz yaptığı gibi.

Sizler pek çok kadına ve genç-  
mize umut ve ilham kaynağısınız.  
Sizlerin ortaya koyduğu ba-  
şarıları, kararlılık, emek ve doğru  
desteklerle her kadının büyük  
hedeflere ulaşabileceğini en  
güçlü şekilde kanıtıyor. Bizler  
de kadın girişimciliğinin önünü  
açacak her türlü desteği sun-  
may en önemli görevlerimizden  
biri olarak görüyoruz.

Ülkemizin dört bir yanından  
kadınların üretim gücünün na-  
sıl bir dönüşüm yarattığını hep  
birlikte şahitlik ediyoruz. Biz de  
Bakanlık olarak kadınların po-  
tansiyellerini ortaya çıkaracak  
politikalarla onların daha güçlü  
ve etkin olmalarını için çalışıyoruz.  
2024-2028 döneminde kapsayıcı

Kadınların Güçlenmesi Strateji  
Belgesi ve Eylem Planımız, bu  
potansiyeli ortaya çıkaracak so-  
mut adımları içeriyor" dedi.  
Ulusal ve uluslararası pa-  
zarlara erişimi kolaylaştıracak  
imkanların sunulduğunu ifade  
eden Göktaş, "Kadın girişimci-  
liğini ve kadın kooperatiflerini  
güçlendiren çalışmalarımızı sür-  
dürüyoruz. Eğitim, mentorluk ve  
pazarlamaya başla olmak üzere  
kadınların kapsamlı destekleri  
sunuyoruz. Bu desteklerle ka-  
dınların işlerini ve markalarını  
büyütmelerini, sürdürülebilir ba-  
şarıya ulaşmalarını sağlıyoruz."

Kadın kooperatiflerinin sür-  
dürülebilir ve rekabetçi hale ge-  
melerini sağlamak için eğitim,  
finansman ve danışmanlık des-  
tekleri sunuyoruz. Kadın giriş-  
imciliğini desteklemek için tüm pa-  
rtnlarımızla ve ilgili kurumların  
projelelerini bir araya getirdiğimiz  
kadirgirisimci.gov.tr" platfor-  
muna kurduk. Bununla birlikte  
e-ticaretin, kadınlar için düşük  
maliyetle geniş müşteri kitlesine  
ulaşma imkanı sunan güçlü bir  
araç olduğunu inanıyoruz.

Hepsiburada ile başlattığımız  
iş birliğiyle girişimci kadınların  
e-ticaret becerilerini geliştirme-  
lerine ve faaliyetlerini güçlendir-  
melerine destek oluyoruz. SPK  
(Sermaye Piyasası Kurulu) ile  
imzaladığımız iş birliği protokolü  
kapsamında kadınlara finansal  
okuryazarlık konusunda 2018  
yılından bu güne rehberlik ya-  
pıyoruz. Finansal okuryazarlığı  
güçlendiren eğitimlerle bugüne  
kadar 1 milyondan fazla kadına  
ulaştık. Kadınları desteklemek  
amacıyla sivil toplum kuruluş-  
larımızla ve özel sektörde iş  
birliklerini önemsiyoruz. Birlikte  
çalışmalar yürüten kadınların  
ekonomik hayata katılmaları  
artırmada kritik rol oynadığını  
inanıyoruz" ifadelerini kullandı.

## ÇANKIRI BELEDİYESİ GÜNEŞ ENERJİ SANTRALİ (GES) PROJESİ HALKIN KATILIMI TOPLANTISI DAVETİ

Dünya Bankası tarafından finanse edilen İller Bankası A.Ş. (İ-  
BANK) aracılığıyla yürütülen "Türkiye Kamu ve Belediye Yenile-  
nebilir Enerji Projesi (KABEP)" kapsamında Çankırı Belediyesi  
tarafından "Çankırı Belediyesi Güneş Enerji Santrali" yapımı  
planlanmaktadır. Söz konusu alt proje için aşağıda belirtilen tarih ve  
saatte halkı bilgilendirmek, görüş ve önerilerini almak için "Halkın  
Katılımı Toplantısı" yapılacaktır.

Alt proje kapsamında çevresel ve sosyal etkiler oluşabileceğinden,  
bu etkilerin yönetimi amacıyla alt projeye özel Çevresel ve Sos-  
yal Yönetim Planı Kontrol Listesi (ÇSYP Kontrol Listesi) ile Pay-  
daş Katılımı Planı (PKP) hazırlanmıştır. Söz konusu planlar, Çankırı  
Belediyesi'nin internet sitesinde kamuya açık şekilde sunulmuş-  
tur. Toplantıya ilişkin detaylar aşağıda yer almaktadır.

Halkımıza saygılı ile duyurulur.

• Toplantı Yeri : İnaç Köyü Sosyal Tesisi  
• Tarih : 28.09.2025  
• Saat : 14.00  
• Proje Sahibi : Çankırı Belediyesi  
• Telefon : 0 (376) 212 14 00  
• E-posta : hilalmasa@cankiri.bel.tr

## Bakan Kacır: Artık eski Türkiye yok

Sanayi ve Teknoloji Bakanı Mehmet  
Fatih Kacır, "Hamdolsun artık eski Türkiye  
yok. Tarihten gelen kadim kültürüyle, üre-  
timci güçlü yönetimiyle lider bir Türkiye  
var artık. Küresel arenada insanlık için  
adalet ve merhamet değerlerinin güçlü  
savunucusu bir Türkiye var" dedi.

Bakan Kacır, "23 yıl öncesinin Türkiye  
fotoğrafını gelin hep birlikte yeniden hatırla-  
yalalım; kırızlarla yorgun düşmüş bir ülke  
ekonomisi, istikrarsız politikalar, potansi-  
yeli bastırılmış bir memleket, her alanda  
önüne set çekilmiş, umudunu yitmiş bir  
millet. İşte 23 yıl önce, AK Parti iktida-  
rını öncesinde karşı karşıya olduğumuz  
Türkiye tablosu böyledir. Ancak bizler,  
Cumhurbaşkanımız Sayın Recep Tayyip  
Erdogan'ın liderliğinde bu kulu vlaya baş  
koyduğumuz gün hep birlikte aslında bir  
söz verdik, 'Eccldamızın mirası bu kıymetli  
toprakları yeniden inşa edeceğiz'  
dedik. 'Özgüveni törpülenmiş, istenen  
dar kısıtlara mahkum edilmeye çalışılan  
Türk milletini yeniden ayağa kaldıracağız'  
dedik. 'Milletimizin irdesini ve iddiasını  
yeniden sahlendireceğiz', dedik. Büyük  
güçlü ve tam bağımsız Türkiye bedevine  
ze giden yolda, 23 yıldır hep birlikte gece  
gündüz çalışarak nice zorlukların, badire-  
lerin, saldırıların ve imhaların üstesinden  
gelmeyi başardık. 86 milyon vatandaş-  
sımızın her türlü mağduriyetini giderdik.  
Milleti ve manevi değerlerimizi örseleyen-  
lerin, haklarını ve özgürlüklerini çö-  
pözümleri karşısında hep birlikte dimdik  
durduk" diye konuştu.

Bugünün güçlü Türkiye'sini her bir-  
likte inşa ettiklerini söyleyen Bakan Kacır,  
"Hamdolsun artık eski Türkiye yok. Ta-  
rihten gelen kadim kültürüyle, üretimiyle  
güçlü yönetimiyle lider bir Türkiye var ar-  
lık. Küresel arenada insanlık için adalet ve  
merhamet değerlerinin güçlü savunucusu  
bir Türkiye var. Cumhurbaşkanımız Sayın  
Recep Tayyip Erdogan'ın liderliğinde son  
tik ve stratejik alanlarda dünyaya söz sa-  
hibi bir ülke olarak göğümüzü kabartan,  
iftihar vesilesi olan nice başarıya sahi-  
biz. İnsansız hava araçlarından helikop-  
terlere, kara araçlarına deniz platformla-  
rına, hava savunma sistemlerinden 5 inci  
nesil savaş uçaklarına kadar geniş bir yel-  
pazede sistemler tasarlayan, geliştiren,  
üreten ve rekabetçi şekilde dünyaya ihraç

23 yıla asırlık hizmetler, vizyoner proje-  
ler, temeli sağlam ve istikrarlı politikalarla  
örünmüş nice kıymetli kazanımlar sağladık.  
Akamete uğratılmış hayalleri bir bir gerçe-  
ğe dönüştürerek, erelenmiş ihtiyaçların  
çözümünü adresi olduk. Bugünün büyük  
ve güçlü Türkiye'sini azz milletimiz hep  
birlikte inşa ettik. Bugün, nihayetinde, kı-

edebilen yerli ve milli bir savunma sanayi  
alt yapısını hep birlikte inşa ettik. Yalnızca  
780 bin kilometrekarelik vatan toprakında  
değil, aynı zamanda mavi vatanında, gök  
vatanda ve siber vatanında hak ve menfa-  
atlerini koruyan; sahada da masada da  
oyun kuran, caydırıcılığı yüksek bir ülke  
inşa ettik" dedi.

## Bakan Kurum: Saatte 23, Günde 550 Konut Üretiyoruz

Çevre, Şehircilik ve İklim Değişikliği Ba-  
kanı Murat Kurum, "Şu anda, saatte 23, gün-

#### Annex-4: Çankırı Municipality Website, Announcements (12.09.2025)

#### Annex-5: Çankırı Municipality Announcements

## Annex-6: Çankırı Municipality Stakeholder Consultation Meeting Brochure

### PROJECT DESCRIPTION, PURPOSE, AND BENEFITS

The Çankırı Municipality Solar Power Plant Sub-Project aims to increase the use of renewable energy in public sector buildings and municipalities, reduce energy bills, and lead the public sector in demonstrating its commitment to climate mitigation through sustainable energy solutions. It will contribute to Türkiye's climate goals while also enhancing Çankırı Municipality's energy security.

This renewable energy project, to be implemented by the Çankırı Municipality, will include the construction of a solar power plant with an installed capacity of 1.900 kWp / 999 kW<sub>e</sub>. The plant is expected to produce approximately 1.798 MWh of electricity annually. This production capacity is sufficient to meet the annual electricity needs of more than 719 households. It has been decided that an EIA is not required. Therefore, the sub-project will be constructed with a 25-year lifespan for the plant.

### PROJECT FINANCE

The sub-project, financed under the Türkiye Public and Municipal Renewable Energy Project (PUMREP), will be implemented by the Çankırı Municipality through a World Bank (WB) loan and İller Bankası A.Ş. The Türkiye Public and Municipal Renewable Energy Project (PUMREP) aims to support the Turkish Government in expanding the use of Renewable Energy (RE) in the public sector, focusing on central government buildings and municipalities.

### CONSTRUCTION DURATION AND WORKFORCE

Construction is planned to last approximately two months, and all necessary equipment and installation work will be carried out by the contractor. 10 personnel will be employed during the construction phase and 2 personnel (both serving as security guards) during the operation phase. Priority will be given to local residents in the subproject's hiring process.

Construction of the Solar Power Plant Project is planned to be completed in two (2) months.

### SUB-PROJECT AREA

Çankırı Municipality Solar Power Plant Sub-Project Area

The sub-project will be constructed on an area of approximately 13.986 square meters on lot 12 of block 170 in the **Isık** neighborhood of the Merkez district of Çankırı province.

Sub-project Site Location

### ENVIRONMENTAL AND SOCIAL IMPACTS

The Environmental and Social Management Plan Checklist (ESMP-Checklist), prepared for the Çankırı Municipality Solar Power Plant subproject, defines measures and controls developed to manage environmental and social impacts that may occur during construction and operation. The measures to be implemented to mitigate risks such as dust, noise, waste management, and occupational health and safety, and the schedule for these measures, are detailed in the ESMP Checklist.

Monitoring requirements are defined in the monitoring tables within the ESMP-Checklist. Accordingly, during the construction phase of the subproject, dust emissions, air pollution, noise generated during construction and from temporary traffic loads, waste generation, and occupational health and safety will be monitored. During the operation phase, chemical storage and use, the power plant's glare and reflection effects, livelihoods, grievances, community conflicts, stakeholder participation, occupational health and safety, and labor parameters will be monitored in accordance with the requirements set out in the ESMP-Checklist and SEP.

2

3

4

These prepared documents have been published in the announcements section of the Çankırı Municipality's official website and are available to all stakeholders. You can access the document by scanning the QR Code below.

The primary institution responsible for implementing this ESMP Checklist is the Çankırı Municipality, which is responsible for the construction and operation of the subproject. The contractor is responsible for implementing environmental and social measures, the consultant is responsible for monitoring and reporting, and the Project Implementation Unit is responsible for overall coordination and stakeholder communication. As part of the Stakeholder Engagement Plan (SEP), a complaint box has been placed in the municipal building to inform the public and receive and evaluate complaints, and communication channels have been provided via email and phone.

### STAKEHOLDER ENGAGEMENT AND GRIEVANCE MECHANISM

Complaints will be received, recorded, and responded to in a timely manner in accordance with the Stakeholder Engagement Plan (SEP). The mechanism will be managed by the Çankırı Municipality, and if necessary, complaints may also be forwarded to İLBANK's independent grievance mechanism.

## Annex-7: Stakeholder Consultation Meeting Presentation

**TÜRKİYE KAMU VE BELEDİYE YENİLENEBİLİR  
ENERJİ PROJESİ**

**ÇANKIRI BELEDİYESİ  
GES PROJESİ**

KASTEP kapsamında, Çarşın Belediyesi tarafından gerçekleştirilen GES projesi için Halkın Katılımı Toplantısı düzenlenecektir. GES projesinin kurulu kapasitesi 1.800 kWp / 599 kWe olarak belirlenmiştir. Toplantının amacı, projeler hakkında halkı bilgilendirmek ve paydaşların görüşlerini almaktır.

## Amaç

- Bu toplantının amacı, Çankırı Belediyesi tarafından hayata geçirilecek olan Güneş Enerji Santrali (GES) projesi hakkında siz değerli vatandaşları bilgilendirmek, projenin çevresel ve sosyal etkileri konusunda şeffaf bir şekilde bilgi sunmak ve sizlerden gelecek görüş, öneri ve soruları dinlemektir.

### Projenin Konumu

- Proje, Çankırı İli, Merkez İlçesi, İnce Mahallesi 170 ada 12 parsel toprakları içerisinde toplam 13,986 hektarlık bir alanda kurulması planlanmaktadır. Santralin ekonoemik ömrü yaklaşık 25 yıl olarak öngörülmektedir.

### Projenin Yerleşim Planı

### Projenin Kazanımları

Kurulu gücü sayesinde yıllık 1.798 MWh elektrik üretimi gerçekleştirilecek olan Güneş Enerji Santrali, çevresel ve ekonomik açıdan önemli kazanımlar sağlayacaktır. Bu üretim miktarı, yaklaşık olarak 719 hanenin yıllık elektrik tüketimini karşılayabilmektedir.

Ayrıca, İZGEMER Enerji ile birlikte 2010 yılında 1.154,48 ton karbondioksit emisyonunun atmosferde tutulması engellenmesi hedeflenmektedir. Böylece hem fosil yakıt kullanımının önüne geçilmekte hem de daha temiz bir çevreye katkı sağlanmaktadır.

GES, yenilenebilir enerji kaynaklarının ülkemizdeki önemini gösterirken; karbon ayak izinin azaltılması, enerji maliyetlerinin düşürülmesi ve enerjide dışa bağımlılığın azaltılması konularında da stratejik bir rol oynamaktadır.

### Beklenen Faydalar

Proje ile Çankırı Belediyesi'nin elektrik ihtiyacını yerel olarak güneş enerjisiyle karşılayarak enerji maliyetlerini düşürme ve enerji arz güvenliğini artırmak hedeflenmektedir.

Çankırı Belediyesi, sürdürülebilir enerji uygulamalarıyla ilimin değışikliğine katkı sağladığını ortaya koyarak kamu alanında öncü bir rol üstlenmektedir.

Müşahade ve işletme sürecinde yerel ihtiyaçlara öncelik verilinceye kadar, proje aynı zamanda bölgesel ekonomik kalkınmaya da katkı sağlayacaktır.

### Proje riskleri ve önlemler

Çankırı Belediyesi GES ALT Projesi için hazırlanan Çevresel ve Sosyal Yönetim Planı (CSYP) hem inşaat hem de işletme sürecinde ortaya çıkabilecek çevresel ve sosyal etkilerin kontrol altına alınması amacıyla hazırlanmıştır (<https://cankiri.bel.tr/dokumanlar/petis-enerjinin-sosyal-ve-cvresel-sonuclari>).

Bu plan yalnızca santral sahası ile birlikte Enerji Nakil Hattı ve ulagam güzergâhlarını da kapsamaktadır. Bu riskler ve önlemlerin bazılarını özetlemek gerekirse;

#### İnşaat Aşamasında

- Toz ve Hava Kirliliği: İnşaat sırasında oluşacak tozun azaltılması için düzenli sulama yapılacaktır, malzeme taşıyan araçlar kapatılacaktır.
- Gürültü: Çalışmalar gündüz saatleriyle sınırlanacaktır, gürültülü ekipmanların bakımları düzenli yapılacaktır.
- Atık Yönetimi: İnşaat atıkları ayrıntılarak lisanslı firmalara teslim edilecek, tehlikeli atıklar güvenli alanlarda depolanacaktır.
- İş Sağlığı ve Güvenliği: Çalışanlara kişisel koruyucu donanım sağlanacaktır, güvenlik eğitimleri düzenli olarak yapılacaktır.
- Trafik Güvenliği: Şantiye çevresinde trafik yönlendirilmesi yapılacaktır, işaretleme ve uyarı levhaları kullanılacaktır.

#### İşletme Aşamasında

- Kimyasal Yönetimi: Kullanılacak kimyasallar (ör. bakım malzemeleri) güvenli depolarda saklanacak ve kontrollü kullanılacaktır.
- Yansımalar ve Parlama Etkileri: Panellerin yerleşim açısı uygun şekilde ayarlanarak çevreye olası parlama etkileri en aza indirilecektir.
- Toplum Üzerindeki Etkiler: Şikâyetlerin alınması ve çözümü için şikâyet mekanizması işletilecek, toplulukla düzenli iletişim kurulacaktır.
- İş Sağlığı ve Güvenliği: İşletme süresince çalışanların güvenliği için periyodik eğitimler, tatbikatlar ve denetimler yapılacaktır.
- Paydaş Katılımı: Halkın görüş ve önerilerinin alınması için düzenli toplantılar ve bilgilendirme faaliyetleri sürdürülecektir.

Projeye ilişkin tüm olası riskler değerlendirilmiş ve gerekli önlemler planlanmıştır. Çalışmalar, ekosisteme zarar vermeyecek ve yerel halkın yaşamını olumsuz etkilemeyecek şekilde, yüksek hassasiyet ve sorumluluk bilinciyle yürütülecektir.

Yine de, proje sürecinde ortaya çıkabilecek her türlü görüş, öneri veya şikâyet için paydaşların kolayca ulaşabileceği iletişim ve şikâyet mekanizmaları oluşturulmuştur.

### ŞİKÂyet MEKANİZMASI

- Paydaş Katılım Planı (PKP) kapsamında halkın bilgilendirilmesi, şikâyetlerin alınması ve değerlendirilmesi için belediye binasında şikâyet kutusu yerleştirilmiş; e-posta ve telefonla iletişim imkânı sağlanmıştır.
- Şikâyetler, Paydaş Katılım Planı'na (PKP) uygun olarak zamanında alınacak, kaydedilecek ve yanıtlanacaktır. Mekanizmanın yönetimi Çankırı Belediyesi tarafından sağlanacak olup, gerekli durumlarda başvurular İLBANK'ın kurduğu bağımsız şikâyet mekanizmasına da iletilenmektedir.

## Teşekkürler!

Bu proje, sizlerin katkılarıyla daha sağlıklı ve topluma faydalı şekilde ilerleyecektir. Görüşlerinizi, sorularınızı, önerilerinizi ve şikâyetlerinizi bizimle çekinmeden paylaşabilirsiniz. Her görüşünüz dikkatle değerlendirilecek ve proje sürecine yansıtılacaktır. Tüm geri bildirimler kayıt altına alınacak, size gerekli dönüşler yapılacaktır. Proje boyunca sizlerle sürekli iletişimde olacağız. Katılımınız, bu projenin başarısının en önemli unsurudur.
